

2ND GREEN

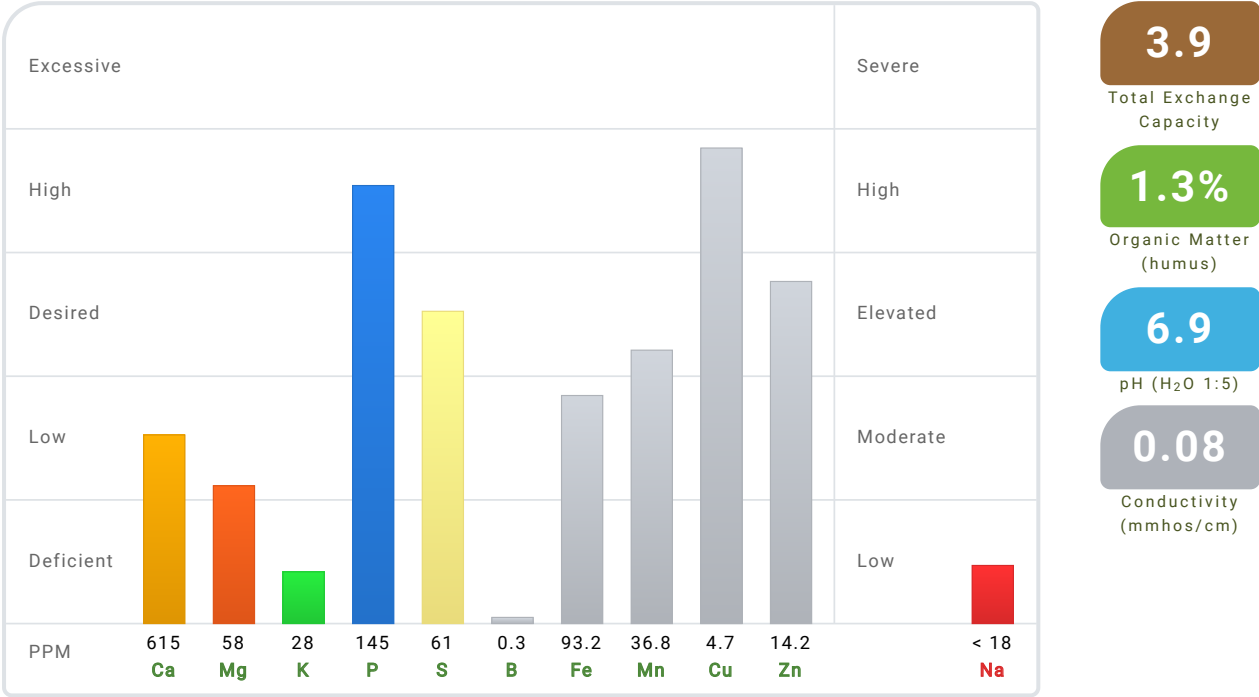

Standard Soil Analysis (Mehlich III Extraction)

Performed by The NINEMIRE GROUP

Client:
North Ryde Golf Club
Field Representative:
Craig Easton
Date of Analysis:
19/8/2024

Soil Nutrient Status

Base Saturation: Key Elements

Kg per Ha of Calcium deficient	724
Kg per Ha of Magnesium deficient	108
Kg per Ha of Potassium deficient	227

Kg per Ha of Phosphorus deficient 0

Apply a total of 31.48 Kg per 100m² of Tru-Gyp over an appropriate number of applications

Apply a total of 6.75 Kg per 100m² of Soilfix Mg over an appropriate number of applications

Apply a total of 14.19 Kg per 100m² of Activate K over an appropriate number of applications

These numbers are to correct soil deficiencies only. Nutrient losses such as leaching or plant uptake should be considered when formulating maintenance programs. TX Trace may be required to increase levels of iron, manganese, or both.
